Wall bracket included for an easy installation and handles recommended for transport

Powerful and fast fogging system, can cover up to 4000 m³ in 3 minutes.

The densest fog among all the fogging systems thanks to 80% of glycol in its fog fluid and the proprietary shooting technology.

It is very easy to change and with a very competitive price.

Thanks to the massive insulation UR FOG fogging systems have a very low power consumption and can shoot for a long time in absence of mains power; temperature is constantly stable.

Another exclusive, patented and very useful plus that allows to detect automatically if the nozzle is tampered and sends an advise signal.

A unique serial bus to plug on the electronic board an add on card that allows to easily interface the machine with alarms and to control the fogging system even from remote. A standard protocol is available for all machines.

NEW

UR FOG fogging systems are certified after European regulation. Fog fluid is assessed as not dangerous for people and animals and does not leave residuals.

UR FOG fogging systems are innovative in their technology and performances, in order to guarantee the most effective protection against thefts and they have different patents.
